Quadra Range

An innovative range of drinking water solutions

Superior instant drinking water solutions

Behind our extensive range of drinking water solutions comes knowledge, experience, research and dedication; all of which allows us to design, build and service our own products so you can enjoy unparalleled product quality and after-care.

From the very start in 1992, inspired by innovation and an environmental conscience, we have embraced superior technologies to create cutting-edge, highly certified products focused on delivering the freshest, best-tasting water in a sustainable way. Our premium range of stylish Billi tapware and space-saving under-counter units offer energy-efficient filtered boiling, chilled and sparkling water in an instant.

Promoting hydration, good health, sustainable business practices and raising awareness of plastic pollution and energy efficiency mean a great deal to us. These are the driving forces keeping us focused on why we do what we do, ensuring we meet the needs of our customers and the needs of our planet too.

Boiling Chilled Sparkling Ambient

Quadra range

Elegant styling and space-saving design.

Our range of boiling, chilled and sparkling integrated water dispensers are designed and manufactured to be energy efficient, offering customers the very best in innovation, superior performance and reliability.

Advanced technology

Safety first

Billi's splash-free boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup. All Billi X Series dispensers are supplied with a safety switch as standard to lock boiling water flow when needed.

Premium filtration

Billi's range of premium filters are equipped with a unique multi-layered structure which provides superior water quality.

Heat exchange

Billi's unique Heat Exchange Technology recovers the waste heat energy produced in the chilling process to preheat the boiling water. This allows boiling water to reach optimal temperature more efficiently while achieving substantial energy savings.

Adjustable chilled and sparkling temperature

A simple adjustable control allows the water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks, with your required temperature being quickly reached and maintained.

Ice bank cooling technology

Billi's Ice bank technology has a chilled reservoir where both sparkling and chilled water supply passes through. In doing so, the dispensed water temperature is consistently chilled, also providing a higher level of carbonation.

Under-counter units

Leading the Billi range, the Quadra boiling, chilled, and sparkling drinking water systems are space-saving and energy-efficient.

Billi Quadra

Instant boiling and chilled filtered water

The functional style is designed for high-use and meets Green Building Design principles – providing you with the ultimate in environmentally sensitive appliances.

Features

-  Safety first
-  Filtration
-  Heat exchange
-  Adjustable chilled temperature

Water options

Boiling, chilled

Up to 60 users

Billi Quadra under-counter unit

Billi Quadra Sparkling

The popular sparkling choice

The Billi Quadra Sparkling system offers the ultimate drinking water experience, instantly delivering boiling, chilled and sparkling filtered water.

Features

-  Safety first
-  Filtration
-  Heat exchange
-  Adjustable chilled temperature

Water options

Boiling, chilled, sparkling

Up to 60 users

Compatible dispensers

Billi Firewall™ Tower dispenser

Compatible with Billi's boiling and chilled Quadra range, the Firewall™ Tower Dispenser incorporates the latest in hygiene technology, including exclusive Firewall UVC purification and BioCote antimicrobial protection.

Firewall safely purifies water up to 99.9999% bacteria free and 99.99% virus-free.

Firewall is also tested and scientifically proven effective in eliminating Covid-19 from drinking water.

Key surfaces are integrated with BioCote®, a silver ion additive which prevents microbial growth on the surface of the products helping to reduce unpleasant odours, degradation of key surfaces and the potential for cross-contamination.

The Billi Firewall™ Tower is also available with contactless dispensing. The hands-free functionality is easy to use, with clear instructions on the machine explaining how the motion sensors work, ensuring there is no cross-contamination between users.

BioCote® has not been tested or proven effective against SARS-CoV-2.

XL Levered dispenser

Dispensing one of four water combinations in either a continuous or single flow, its position-sensitive levers make it simple to enjoy the drink of your choice in an instant. The safety feature enables you to 'lock' the tap to prevent boiling water being dispensed and the splash-free technology reduces the risk of splashing as the boiling water first enters the cup.

XR Remote dispenser

The remote dispenser is an alternative option of the lever free dispenser. The operation panel is located away from the dispenser and can be installed in your desired position to meet requirements, such as wheelchair access.

Optional accessories

Font and Riser

Partner our range of dispensers with the optional font and riser for filling sports bottles, carafes and bottles.

Sustainable technology

Billi integrated dispensers are renowned for their eco-focus, ensuring the sustainable appliances go beyond water and energy-saving to reduce consumption and limit waste.

Energy-efficient technology

Billi's water-cooled Heat-Exchange technology recovers the waste heat energy produced in the chilling process to preheat the boiling water, enabling our systems to achieve substantial energy savings.

The thermodynamic technology not only ensures our water-cooled systems are energy-efficient but that the associated water usage is kept to an absolute minimum.

We are the only manufacturer to offer both water-cooled and air-cooled options. Our air-cooled system generates far less heat than traditional air-cooled units.

High performance insulation

Polyethylene insulation retains water temperature and saves energy.

Energy-saving modes

Billi systems are designed to conserve energy even during periods of inactivity. This is achieved in two ways: an inbuilt 7-day time switch ensures the system is running only when it is needed; and an energy-saving standby mode can be selected to activate after a pre-set time of non-use.

GreenTag certified

We are proud to be GreenTag certified, one of the world's most trusted and widely recognised ecolabels.

GreenTag independently assures that every product is fitness tested and certified under leading certification programs that use the world's best scientific methods. It has earned the reputation and trust of thousands of buyers, hundreds of companies, and numerous green building councils, certification bodies and governments around the world.

Billi complies with GreenTag International standard v.32 with Gold level certification on the Quadra models.

Billi benefits

Billi sets the benchmark for under-counter innovation and design.

A favourite with corporate offices and hospitality establishments due to the sophisticated tapware and space-saving under-counter design, Billi integrated dispensers deliver energy-efficient filtered boiling, chilled and sparkling water in an instant.

Elegant styling

Enjoy modern, stylish tapware that perfectly complements any workplace and delivers filtered water at the touch of a button.

Space-saving design

Billi under-counter units have one of the smallest footprints on the market making them easy to install in any workplace, allowing you to make the most of available cupboard space.

Choice and functionality

With boiling, chilled, ambient and sparkling water options, matching drainage font and two different sized risers that cater for jugs and sports bottles, you can select the right product combination for your space and hydration needs.

Energy-saving performance

Our Quadra chilled and boiling configuration incorporates our unique water-cooled technology, which recovers the waste heat energy is produced in the chilling process to preheat the boiling water. This helps to achieve substantial energy savings and also means no unsightly cupboard ventilation or noisy cooling fan is needed.

Boiling water safety features

A safe and energy-efficient alternative to the kettle, simply touch the sensor and push the lever down to release the lock and activate the boiling water. Our system automatically slows the delivery of boiling water as it first enters the cup to reduce splashing.

Great-tasting filtered water

All our Billi integrated dispensers contain multi-layered filter technology, designed to deliver superior quality and great-tasting water time after time.

Our commitment to quality

All Billi integrated dispensers are manufactured to strict quality standards. Every system is designed to provide the highest possible standards of efficiency and energy savings.

Certifications

- Every Billi integrated dispenser is manufactured under a certified quality control system. They have been tested and comply with all relevant standards.
- Billi Quadra are tested to and comply with; Watermark Licence Number 21525; AS3498.

Tested and approved

All Billi systems are also tested to:

- AS/NZS 4020; AS1428 Accessibility Design Requirements.
- Billi is also ISO 9001 Certified Certificate Number QEC11627.
- Billi Quadra products are certified Gold Level under Global GreenTag Standards.
- Billi water and air-cooled under-counter systems (Quadra, Sahara and Alpine models) with XL dispensers are WRAS approved. WRAS Approval Number: 1806056.

Standard warranty

All components of the Billi integrated dispensers are covered by a 24-month warranty.

CE QUALITY & SAFETY GUARANTEED

Total Care service you can trust

To ensure optimal water quality and ongoing high level product performance, we offer a complete after-sales service.

Enjoy hassle-free installation, regular servicing and maintenance from our fully qualified technicians.

Easy installation

Our expert service technicians are ready to install your new water system at a date and time that is convenient for you.

Regular servicing

Servicing includes sanitisation and filter replacements to ensure the high quality of your water is maintained and there's no compromise on performance. Preventative maintenance ensures a trouble-free operation for total peace of mind.

Professional maintenance

In the unlikely event that something should go wrong, there's no need to worry as our Total Care team are available to handle your query, big or small. We will do our best to diagnose the problem over the phone, ensuring our technician arrives with the correct parts and tools to complete the repair for you straight away.

What our customers say

Costa

Costa's Engineering Manager was tasked with choosing a very efficient under-counter system to dispense boiling and chilled water that would not take up too much space. Across the three floors of their Basildon coffee roastery, they chose Quadra 440 with XL levered dispensers in chrome and matching drainage font. The Billi integrated dispensers are a valued addition to their office space, giving staff an opportunity to enjoy coffee alternatives.

"We were really pleased with the overall Billi experience, the team were very helpful and we felt supported all the way. We have had previous experience with under-counter water systems, so we were looking for a stylish tap to go with our modern design as well as a reliable customer service. So, we chose Billi!"

Marc Congdon,
Engineering Manager, Costa

Ogilvy & Mather

Ogilvy & Mather UK is a global advertising and marketing agency made up of nine world-class companies based in London.

Extending over several floors, the project included high-quality filtered drinking water systems for staff and visitor refreshment. The criteria for choosing the systems was very specific:

- space, energy and time efficient
- premium quality
- installation carried out professionally and in a specific time frame

"We regard Billi taps as the very best quality and reliable, with an excellent service package as back up. These units were installed on time professionally by friendly engineers and the aftersales team are always ready to help if needed."

Anabas,
Facilities, Ogilvy & Mather

Mothercare

During a major refurbishment of their head office, Mothercare was facing the issue of how to meet the demand from around 700 employees for hot and chilled filtered water across three floors.

A cause of staff frustration was the inability to get a drink when needed, and through the unique energy-efficient technology, the Billi Quadra range provided the solution.

"We are very pleased with the response time. The experience from getting a quote, installing the taps to dealing with any questions afterwards was great and promptly dealt with."

Alan Jeffery,
Head of Store Development
and Facilities, Mothercare

Kobalt

With around 300 employees in their London office it can get very busy in Kobalt's café area, and to keep everyone happy and productive, the facilities team had to think of smart ways to deliver refreshments during peak times.

The Facilities Manager wanted to eliminate kettles and bottled water. He looked instead for a boiling, chilled and sparkling water tap solution for all their tea points as well as their reception area.

Our popular sparkling integrated dispenser, combining boiling, chilled and sparkling filtered water was the perfect solution, giving the team a wide range of drinks to enjoy daily.

"There are no queues in the kitchen and the quality of the filtered water is fantastic. I am very pleased with the team, they have been brilliant during the installation and their response time is spot on. Boiling, chilled and sparking water at our fingertips has been a smash hit so far!"

Paul Fraine,
Facilities Manager, Kobalt
